Engineering Leader — Platforms & Global Teams

Ex Uber | Myntra | Intuit

- Engineering leader with 17+ years in technology and 6+ years building and scaling engineering organizations. Seeking a Senior leadership role to drive AI-forward platform and product engineering at scale.
- Scaled platform org from 3 to 24+ engineers across the US, India, and Brazil.
- Led the integration of Uber's first GenAI support bot for business customers
- Architected multiple platforms serving 30,000+ global agents and 14M+ consumers.

Core strengths

Leadership : Org design & scaling · Platform strategy & architecture · GenAI adoption · Cross-geo execution · Leadership development · Operational excellence, Stakeholder management

Technical: JavaScript, React, Node.js, GraphQL, Web architecture, PWA, RPC, Microservices, Java

AI & Tech Enthusiast (May 2025 – Present · India)

Planned break after relocating from the US to India; used it to go deep, hands-on, into applied AI.

- Learning AI ecosystem and closely following latest advancements.
- **Hands-on** with modern AI engineering — LLM integration, multi-agent systems, and AI-assisted development.
- Envisioning **Future AI-forward engineering workflows** — the operating model every engineering org needs to adopt.

Uber —(Dec 2018 – May 2025 · 6.5 Years)

Engineering Manager II (Worked in California)

New Business Onboarding & Configuration Platform

- Spearheaded the strategic product roadmap for the business onboarding platform called **CO Console** within Uber's Customer Obsession (CO) Org which owns Uber's in-house customer care solution.
- Orchestrated integrations across **12+ business lines and partners**, including **autonomous mobility partners such as Motional, WeRide and Waymo** and delivered multi-million dollar cost efficiencies.
- Enhanced operational productivity by cutting issue resolution times in half.
- **Scaled the org from 3 to 24+ engineers across the US, India, and Brazil.** Onboarded 2 engineering managers and their 14-engineer teams: drove their project planning, expanded their charter, and built the pod structure and processes that let a cross-geo org execute as one.
- Led the **experimental integration of Uber's first GenAI-powered support bot** for Uber business customers on the customer-care infrastructure.
- Envisioned and built the centralized **CO Console – Onboarding and Configuration Platform** reducing new-business onboarding time by up to **90%**, reducing work needs from months to days.
- Championed engineering-excellence processes (planning, triaging, monitoring) that cut average project development time by **50%**;
- Successfully drove migration of infrastructure from **Salesforce to CO**, with an 84% reduction of Salesforce licensing usage starting 2024 onwards saving millions in licensing costs.

Multi Channel Modality Infrastructure

- Led conversational channel platform for Customer Obsession. Provided integrated support across multi-modal interfaces including Chat, WhatsApp, and Email.
- Architected and transformed the B2B email ecosystem into a highly adaptable framework, seamlessly funneling enterprise client communications into centralized support infrastructure.

Engineering Manager I

Global UI Platform Modernization | (Worked in Bangalore)

- Led **16+ engineers** to deliver Uber's Modernization of complete Customer Care UI Platform involving multiple apps.
- Architected the web-stack modernization and migration strategy, cutting widget development time from 4 weeks to 5 days (**80%+ reduction**) and building a platform community across the org.
- Evangelized and executed a complex middleware layer of graphql & rpc which connects UI with most of Uber's service layers.

- Leveraged & Connected multiple similar needs into one effective solution (Hydration gateway was primarily designed for backend hydration, enabled frontend on the same platform.
- Leveraged strategic relationships across multiple teams such as SF for Virtual GL, Bliss-Insights, help.uber.com (for Automation components).

Senior Software Engineer (Worked in Bangalore)

Next-Gen Customer Care UI — BlissNxt

- Built Uber's next-generation Customer Care UI, serving **30,000+ global agents** handling millions of tickets — **3x faster loads, 40% faster ticket resolution**.
- Built component library called Blis mosaic, which later used to build multiple apps in CO
- Built a new app – Case Management which handles multi interlinked tickets used to handle safety , legal issues.
- Cultivated a **vibrant UI community** by establishing cross-org discussion forums and feedback loops, driving decentralized innovation and collective knowledge sharing across Uber India.

Myntra (Fashion E-Commerce) (Jan 2014 – Dec 2018 · 5 Years)

Frontend Architect

Company-wide UI architect leading high-impact, cross-company platform initiatives on performance and engagement.

- Architected **Myntra's PWA – 37% conversion lift**, scaled from 100K to **14M monthly users**, **3x** faster loads, 71% smaller JS bundles. [Link](#).
- Partnered with **Google** to rebuild the site on AMP in **7 days**, driving a **12% revenue increase** – **showcased on stage at Google I/O 2017**. [Link](#).

Senior Software engineer

- Engineered **Unity**, a comprehensive from-scratch framework comprising a template architecture, smart component library, and thematic engine designed for rapid application development.
- Conceptualized a **configuration-driven UI model** that balanced maximum flexibility with rapid deployment, enabling teams to launch new applications in hours rather than months. [Link](#).
- Unity standardized development across the organization, powering **50+ internal applications**.
- Achieved a **90% reduction** in application development cycles, accelerating delivery from eight weeks to just 7 days.
- Demonstrated high architectural scalability by seamlessly integrating the **Jabong** technology stack.

Intuit — Senior Software Engineer (Jan 2008 – Dec 2013 · 6 Years)

- Engineered a **Cross-platform hybrid UI framework** powering a banking solution across web, native Android, and iOS (QuickBooks ecosystem).
- Youngest recipient of the **Intuit India Innovation Award** for product and process innovation.

Recognition & Speaking

- **Google Hack Day (2017)** – Recognized with the **Best Progressive Web App** award at Google Gurugram.
- **Google I/O 2017 showcase on stage – Myntra's AMP implementation**.
- **Keynote Speaker** on **AMP Architecture** for the **Google AMP Roadshow** (Bangalore, 2018).
- **Presented** strategy for **Building Practical PWAs at Scale** at the **Fragments 2017 Android Conference**.
- **Speaker** at **Flipkart SlashN 2018**, detailing the **Myntra Web Technology evolution**.
- Honored with the **Intuit India Innovation Award (2010)**, a premier corporate recognition.
- Facilitated numerous **technical workshops, meetups** across various academic and professional settings.

Education

- **Master of Computer Applications**, PES University, Bangalore, India (2005–2008)
- **B.Sc.** Computer Science, Electronics & Mathematics, Mangalore University, India (2002–2005)
